

MouseListener

```
graph BT; RB[RadioButtonBehavior] -.-> MS[MouseListener]; RB --> RS[RadioButtonStateSubject];
```

The diagram illustrates a class hierarchy. At the bottom is the class **RadioButtonBehavior**. Two arrows originate from its top edge: a dashed arrow pointing to the **MouseListener** class box on the left, and a solid arrow pointing to the **RadioButtonStateSubject** class box on the right. Both **MouseListener** and **RadioButtonStateSubject** are positioned at the top of the diagram.

RadioButtonStateSubject
